## **ENVIROMENTAL SUSTAINABILITY STATEMENT.**

North Park Veterinary Group takes environmental sustainability as a top priority to help not only the wider world but the practice itself.

We welcome any suggestions to improve on our performance.

We take measures to reduce waste without compromising on quality of care.

### Client Awareness

1. Are clients aware that their pets have a carbon footprint? Educate with info on how they can be reduced, looking at the food they feed and it's packaging, consider toys bought and what they are made of.
2. Obesity. If obesity was stopped in all domestic pets it would result in a large reduction in the carbon footprint of pet food manufacturing and its waste
3. Inform clients what we are doing to reduce our footprint.
4. Encourage those that can, to walk to surgery
5. Reduce sales of toys etc made with plastic.
6. Encourage clients to return unused medication for safe disposal.
